

U.S. and Canadian Institutions Listed by Fiscal Year (FY) 2014 Endowment Market Value and Change* in Endowment Market Value from FY2013 to FY2014

Before reviewing the data on the following pages, please note:

For most institutions, the endowment values listed on this table are based on the fiscal years ending June 30, 2014 (for FY2014) and June 30, 2013 (for FY2013).

*The change in market values listed for the participating institutions **DO NOT represent the investment rate of return for the endowments' investments**. Rather, the change in the market value of an endowment from FY2013 to FY2014 reflects the net impact of:

- 1) withdrawals to fund institutional operations and capital expenses;
- 2) the payment of endowment management and investment fees;
- 3) additions from donor gifts and other contributions; and
- 4) investment gains or losses.

The market values also include the estimated valuations of real estate and other “illiquid” assets, which may have large increases or decreases in value during a relatively short period of time. In addition, transfers to the endowment from other institutional budget accounts may account for the differences in growth in endowment assets.

These factors suggest that any large increases or decreases in endowments over the past year may be exaggerated. As such, large percentage changes should be interpreted very cautiously.
