770 institutions provided spending rate information for the 2007 fiscal year. Table data are equal-weighted. Institutions have the opportunity to report ten years of spending rate data in each year's survey.

Technical note:

As in past years, responding institutions had the opportunity to provide 10 years of spending rate data when completing the survey. For this reason, historical spending rate data is updated in each release of the NES. Because institutions have the opportunity to provide updated figures and because the number of responding institutions has increased in each survey year, there is slight variation in the average spending rates reported in the 2007 NES and those reported in previous year reports.
