Business Case for Campus Efficiencies and Climate Change

Sustainability Advisory Panel of NACUBO
SAP Mission: Established to strategically guide the association to help member institutions lead the way towards a more sustainable future.

What do your students, staff, legislators, board, and/or community expect from the campus in sustainability efforts?

How much waste and recycling per student does your campus produce?

When will water be the most expensive utility?

How many gallons of water a day per student do you use?

Where does your fuel source come from now?

What is your carbon footprint?

How are you maximizing your campus space?

Where will you get your energy from in 20 years?
