Disaster Resilient Universities® Network

The DRU Network assists universities by providing practitioners a multidisciplinary on-line platform to leverage their diverse knowledge, expertise, and skills. Collectively we strengthen the resilience of universities by sharing our experiences, strategies, technical resources, processes, and lessons learned.

A Peer-to-Peer network that links, leverages and aligns resources and collective expertise

A hub for those charged with overseeing campus safety, health, risk and emergency management

The DRU Network in partnership National Center for Campus Public Safety and the University and College Caucus of the International Association of Emergency Managers have developed a number of tools and resources:

- Disaster Resilient Universities (DRU) network
  - 2200 members representing over 700 higher education institutions
- Annual workshops and round-table series
- Standards and resilience crosswalk tool
- National Intercollege Mutual-Aid Agreement (NIMAA)

National Higher Education Emergency Management Needs Assessment

The Disaster Resilient Universities Network, the National Center for Campus Public Safety and the International Association of Emergency Managers-Universities and Colleges Caucus partnered to conduct a nationwide survey of emergency management programs. The survey assessed how institutions plan for, respond to and recover from natural, human caused, biological and technology associated emergencies including earthquakes, floods, severe weather events, disease outbreaks, active shooter, chemical spills, and cyber-attacks among others. Survey results identified five key emergency management program needs across higher education: institutional engagement; training and exercises; plans and operational continuity; staffing and resources, and partnerships and assistance.
