Updated FAQ
  • First Issued Jan 14 and Updated March 19 with Questions 22-28 and a slight tweak to question 12
Notice of Interpretation for Period of Allowable Expenses

Answers the date question

All HEERF allocations can be used for permitted uses dating back to March 13, 2020

Applicable to both the emergency grants to students share and the institutional share

Guidance also makes clear that the one-year spending period for each individual HEERF allocation is reset with the granting of each additional HEERF allocation.

No-cost extensions of up to one year for these awards also are available under certain circumstances.
All HEERF funds can be used to make grants to students beyond just those who are Title-IV eligible, including:

- non-degree-seeking, non-credit, dual enrollment, and continuing education students
- students who have left school for any reason during the period of the national COVID-19 emergency that began on March 13, 2020
- students who are qualified aliens, including refugees and persons granted asylum.

Schools may provide all emergency grants directly to students using the institution’s normal process for providing a credit balance refund to students without obtaining a student’s consent, if these funds remain unencumbered by the institution.

Institutions can also directly use their institutional share to pay unpaid student account balances or other student account debts.
Institutional Share

• Guidance confirms that institutional shares of HEERF aid can be used to cover employee benefit expenses, as a component of payroll, if the costs are newly associated with the coronavirus pandemic.
